

Key Features

- **High Compatibility** : Printable with industrial UV and solvent printers.
- **Versatile Application** : Ideal for both hard and clay models, perfect for interior component design.
- **Superior Flexibility** : Sticker-type film that stretches smoothly without applying heat.

When using a UV printer, it is possible to replicate textures (such as leather) by layering multiple print coats. However, please note that the more print layers you add, the less flexible the film becomes, making it harder to stretch.

Precautions Before Use

Please check printer compatibility before purchasing or using.

Compatibility may vary depending on ink type and core size.

Dimensions : (Available in two different widths)
600mm width / 1,200mm width Length : 20m
Core Inner Diameter : 76.2mm

Before using this product, please read through these instructions, then handle the product in a safe and proper manner.

Failure to follow the warnings below may cause fire, resulting in severe injury or death.

Fire & Extreme Heat Safety / Keep away from heat sources.

Do not use or store the product near open flames or heat sources, as this poses a fire hazard.

Failure to follow the precautions below may result in injury or cause damage to surrounding equipment.

Store the product in a stable location.

Do not place this product on an unstable table or counter, or lean it against a wall.
Doing so may cause the product to fall and result in injury.

Do not touch the sharp edges or cut sections of the sheet, as doing so may cause injury.

When using the sheet, pay attention to your surroundings.

Operating without situational awareness may lead to unexpected accidents or injury.

Usage & Storage Guidelines / Usage Precautions

Whether the product is actively in use or placed in storage, please avoid exposing it to the following environments or conditions.

Extreme Temperatures.

Do not store the product in areas subject to extremely high or low temperatures, as this can alter its structure or degrade its quality.

Direct Sunlight.

Avoid exposing the product to direct sunlight. UV exposure may cause color fading and degrade the quality or structure of the material.

High Humidity & Steam.

Do not store or use the sheet in highly humid or steamy environments, as moisture can negatively impact its performance and material integrity.

Improper Tensioning / Slack.

Do not leave the sheet loose or slackened. Failing to keep it properly secured may compromise its structure or performance during use.

Heavy Loads.

Do not place heavy items or packages on top of the sheet.
Excessive weight can deform or damage the material.

Physical Handling & Impact / Avoid sudden impacts.

Subjecting the sheet to severe shocks or heavy impacts may cause damage or permanent deformation.

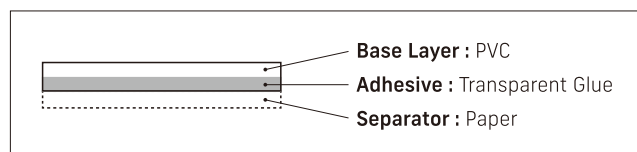

Do not reuse the sheet.

Denaturation or deterioration may occur once the sheet has been applied to a model surface.
We strongly advise against reusing the sheet.

★ This product is considered a modeling material.
Do not use this product for other purposes.

★ Please use the printer equipment correctly and safely in accordance with its instruction manual.

★ When using an edged tool, please follow the instruction and use it safely.

Instructions for Use

- 1 **Open the box.** (Please ensure handling and operations are carried out by two or more people.)
- 2 **Remove the side protectors from the roll media.**
- 3 **Take it out of the plastic bag and peel off the edge-holding sticker.**
- 4 **Set up the printer.**
- 5 **Output the print data.**
- 6 **Once the output is complete, cut / detach the media.**
- 7 **Rewind the remaining roll media and remove it from the media holder.**
- 8 **Apply an edge-holding sticker to prevent the edges from curling.**
- 9 **Place it back into the plastic bag, attach the side protectors, and store it in the box.**

Limitation of Liability

- ★ Product specifications are subject to change without notice.
- ★ If this product is proven to be defective, a replacement will be provided. We disclaim any liability beyond product replacement.
- ★ To the best of our knowledge, the information herein is given in good faith, but no warranty, expressed or implied, is made.
- ★ We assume no responsibility for loss or damage resulting from usage other than as specified in these instructions.
